

LIGHT ALUMINIUM CLIMBING LADDERS

Specifically designed for climbing poles of circular or polygonal section.

Standard lengths can be assembled to create the total length required.

The ladder is made of light aluminium alloy, provided with anti-slippery rungs and with special tracks for the anti-fall device.

The ladder can be composed by using the following elements :

- One self-supporting base for fixing the ladder to the pole without ground contact required (SCP003)
- Several standard sections according to the total required height (SCP001)
- One terminal section, with anti-fall device, to be connected to the last standard section, in order to adjust the length (SCP002).

Option : working platform applicable to the ladder at required height (SCP005).

Mod.	Description	Section length	Working load	Weight	Anti-fall device (mod.)
		[m]	[kg]	[kg]	
SCP001	Standard section	2.5	100	6.6	SDA022 (not included)
SCP002	Terminal section	2.5	100	7	SDA021 (included)
SCP003	Supporting base	-	100	5	-
SCP004	Supporting base section	2.5	100	7	Use the one of the standard section
SCP005	Working platform	-	100	1.2	-
